Construction Report Brochure

Construction Research

World Market Intelligence provides industry-leading global business information and marketing solutions. Our products and services help businesses and individuals make better decisions, win new business and position themselves more effectively.

Our reports draw on in-depth primary and secondary research, proprietary databases and high quality analysis from our expert teams. Data and analysis at the company, country and industry level includes competitor and market data, valuations, trends and forecasts.

Our reports are targeted at professionals working across the construction value chain, in all aspects of your role. We provide:

- **Competitive Intelligence:** benchmark your competitors, track and assessing their activity, and evaluating competitive risk
- **Supplier & Partner Sourcing:** identify partner opportunities, qualify your supplier and partner suitability
- **Customer Tracking & Analysis:** tracking project trends, allowing tender preparation, analysing history of previous construction projects
- **Sales Lead Generation:** detailed profiles of projects, financial deals and real estate transactions allowing you to identify the project and partners with the best fit to your strategy and capabilities
- **Market & Business Planning:** identify and evaluate market opportunities, formulate and validate business strategies

Our team includes experienced analysts, researchers, editors and consultants with many years of experience in the construction industry. They produce data and reports that are sourced according to a comprehensive methodology:

- **Company Data:** company information is derived from company annual reports, statements and websites, news releases, external news sources and information providers. Analytical company content is created by WMI's in-house analyst team
- **Survey Data:** we have hundreds of thousands of high-quality contacts across the global built environment industry. Our databases are made up of highly engaged, qualified professionals who rely on our flagship media brands
- **Project Data:** our project database is derived from secondary sources including company news releases, published invitations to tender, external news sources and information providers. We also carry out primary research using our in-house research team
- **Deal Data:** our deal reports database is derived from secondary sources including company annual reports, statements and websites, news releases, external news sources and information providers
- **Market Data:** WMI has a standard process for market data research across all of its products. Our market data research is based on a rigorous methodology including secondary and primary research and comprehensive data modelling based on our industry expertise and benchmarks

Types of Report

World Market Intelligence currently produces three core report types in the construction industry:

- **Industry Outlook Reports**

WMI's Industry Outlook Reports provide detailed insight into the views of leading professionals across the global construction industry. Our Industry Insight Panel of more than 500,000 business professionals and our ownership of flagship construction media brands allows us to target industry professionals in a trusted context, and hence gain strong response rates providing knowledgeable and informed opinion.

The reports analyze how market players' strategies, practices and business are being affected by recession and market uncertainty. They provide category-level spending outlooks, business challenges and investment opportunities seen by key decision-makers. The reports also examine buyers' and suppliers' growth, merger and acquisition and investment expectations.

In an economic climate set to remain uncertain for some time to come, WMI's Industry Outlook Reports provides you access to the opinions and strategies of leading purchase decision makers and competitors.

- **Market Intelligence Reports**

WMI's Market Intelligence Reports provide detailed data and analysis covering market values, historic performance, future growth and segmentation across the whole construction industry spectrum – construction spending, construction equipment and construction materials. They also contain analysis and details of construction projects, company financials and analysis covering leading players across the value chain, and information on key construction industry deals.

The reports are produced at both country and global industry level, allowing you to focus on specific geographical opportunities or specific end-user markets.

Market Intelligence Reports provide you with all the key market, company and country information you need to inform your business planning, to target your investment into the right sectors, to understand how to bid for major projects, and to grow your business.

- **Market Profiles To 2013**

WMI's Market Profiles To 2013 provide targeted data and insight covering specific niches within a country's construction industry. They contain historical, forecast and segmented market information, company data and country overview information.

The reports give you overview-level insight into new regional or industry opportunities, gaining a top-level understanding of the market and competitive landscape. They allow you to explore and evaluate the potential for new opportunities in new markets at a relatively low cost compared to in-house research.

World Market Intelligence provides industry-leading global business information and marketing solutions. Our products and services help businesses and individuals make better decisions, win new business and position themselves more effectively.

Our business spans three areas:

- **Media & Marketing**

Our media brands have a history of providing market leading information products and services that dates back over 130 years. Through our multiplatform media networks we have relationships with hundreds of thousands of industry participants, enabling us to offer powerful and comprehensive marketing solutions to our clients.

- **Research Reports**

World Market Intelligence publishes in-depth strategic intelligence reports across many key industries. Our reports draw on in-depth primary and secondary research, proprietary databases and high quality analysis from our expert teams. Data and analysis at the company, country and industry level includes competitor and market data, valuations, trends and forecasts.

- **Premium Information**

Our Premium Information Services are unique, interactive desktop decision tools for executives & analysts in a range of functions and industries. Subscribers receive access to comprehensive business planning tools, databases, opinion and research reports integrated with innovative desktop and email tools for easy search, browse and data access. We also provide custom research and consulting solutions.

World Market Intelligence's core brands have been active in business information since 1873, and we employ more than 150 people across our various research areas.

We are part of Progressive Media Group, one of the world's leading media, information and communication groups.
